My name is Nori and I'm a 4th year psychology student. I grew up in Japan and am experienced with leadership roles, both in school and extracurricular activities. Here at UBC-O, I've had the fortune to have been an RA as well as an executive for the JCC and Karate Club. These experiences have taught me to be diligent, responsible, passionate, and student-oriented. The biggest reason for me to run for the VP Internal position is because I can improve the bridge between the SUO and the students with more transparency. When I say "transparency" I don't mean simply making important information such as campus events, policy changes, or major deadlines available, but broadcasting that information to all the students. One way I specifically plan to implement this is by using screens around campus. These screens would also help clubs and student initiatives gain traction from by giving them a platform to showcase their activities and ideas! As an asian student from Japan who has personally experienced financial and mental struggles, another thing I can bring to the table is more diversity among the executive team. I believe I am more equipped to understand the perspectives and be in touch with other students in need. Having me in this position will not only benefit current students but future students of UBCO as well. I thank you in advance for voting!
